

## How to upgrade mobile banking from version 2.0 to 3.0

- Open mobile banking App and click the button [Upgrade immediately] in the pop-up window of the upgrade;

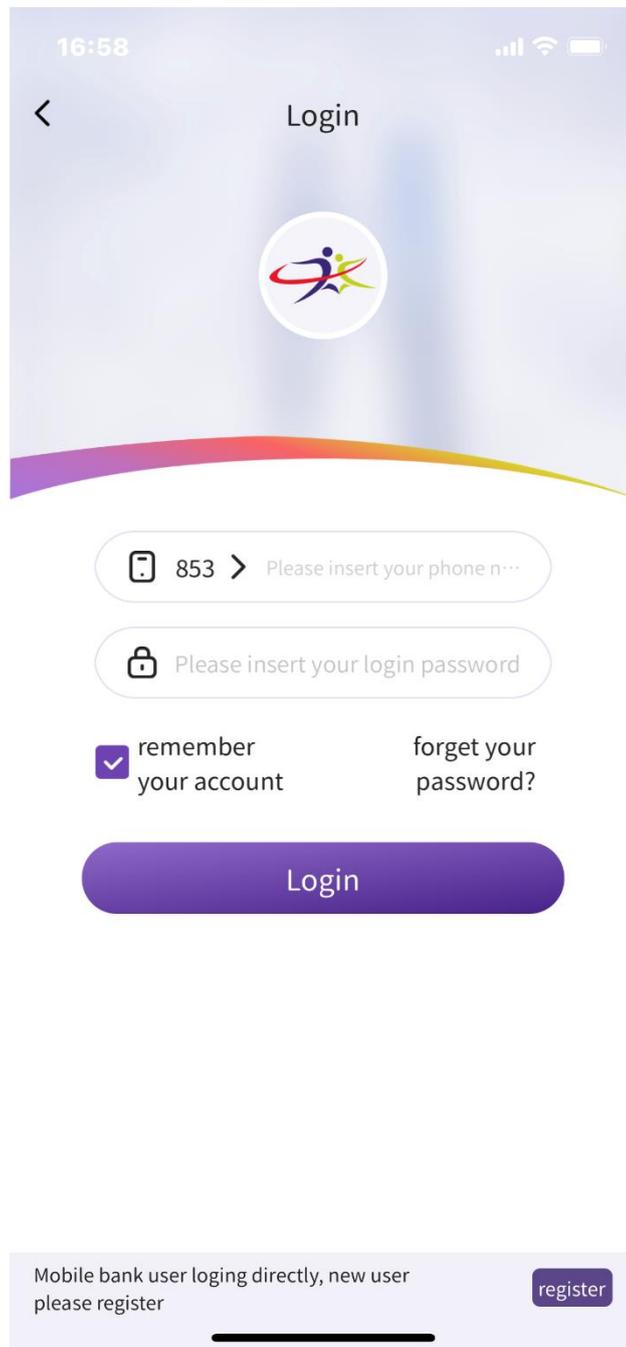

- The system jumps to the App store or Google play page, then you click the [Update] button (the update will consume a certain amount of data, please update it with Wi-Fi);

- After the update is successful, open the new version of mobile banking, then you can see the homepage of the mobile banking;

- Click the [Login] button to enter the login page;

- Enter the account name (that is, your mobile phone number registered with our bank) and login password, and click the [Login] button (For the convenience of logging in next time, you can tick "Remember login account");
